**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Presently Amended) A wearable body support system, comprising:  
a first elongated cushion assembly and a second elongated cushion assembly;  
an upper strap attached to a top portion of said first and second elongated cushion assemblies and configured to attach to a user's waist;  
wherein said first elongated cushion assembly and said second elongated cushion assembly are separate components and are configured to be worn by a user and provide cushioning and support to the user's posterior lower torso and legs;  
an upper torso support having an upper cushion assembly, a pair of arm straps attached to said upper cushion assembly and a bottom strap attached to a bottom portion of said upper cushion assembly; and  
wherein said upper torso support is configured to attach to a user's upper torso and provide cushioning and support to the user's back;  
said upper cushion assembly includes a padding element; and  
wherein said padding element in said upper cushion assembly includes a buoyant material.
2. (Cancelled)
3. (Original) The wearable body support system of claim 1, further comprising:  
a first lower leg support and a second lower leg support;  
said first and second leg support including a lower leg cushion assembly and a lower leg strap attached to said lower leg cushion assembly and a lower leg strap attached to said lower leg cushion assembly; and

wherein said first and second lower leg supports are configured to attach to the user's lower legs.

4. (Original) The wearable body support system of claim 1, further comprising:  
a connecting strap extending between and connecting a top portion of said first elongated cushion assembly and a top portion of said second elongated cushion assembly.
5. (Original) The wearable body support system of claim 1, further comprising:  
a first knee support attached to said first elongated cushion assembly and a second knee support attached to said second elongated cushion assembly.
6. (Original) The wearable body support system of claim 1, wherein said first and second elongated cushion assemblies include a padding element and a cover.
7. (Cancelled)
8. (Cancelled)
9. (Presently Amended) The wearable body support system of claim 1 2, wherein said upper cushion assembly includes an inflatable tube element.
10. (Original) The wearable body support system of claim 6, wherein said cover includes a graphic.

11. (Presently Amended) A wearable body support system, comprising:  
a first elongated cushion assembly and a second elongated cushion assembly;  
an upper strap attached to a top portion of said first and second elongated cushion assemblies configured to attach to a user's waist;  
a connecting strap extending between and connecting a top portion of said first elongated cushion assembly and a top portion of said second elongated cushion assembly;  
wherein said first elongated cushion assembly and said second elongated cushion assembly are configured to attach to a user's body extending from the user's lower torso to the user's legs and provide support to the user's posterior lower torso and legs;  
an upper torso support having an upper cushion assembly, a pair of arm straps attached to said upper cushion assembly and a bottom strap attached to a bottom portion of said upper cushion assembly; and  
wherein said upper torso support is configured to attach to a user's upper torso and provide cushioning and support to the user's back.

12. (Cancelled)

13. (Original) The wearable body support system of claim 11, further comprising:  
a first lower leg support and a second lower leg support; said first and second leg support including a lower leg cushion assembly and a lower leg strap attached to said lower leg cushion assembly; and  
wherein said first and second lower leg supports are configured to attach to the user's lower legs and provide support to the user's posterior lower leg.
